

Inbox

Strategy, creativity, technology

Inbox is a Belgrade based full service online software development company.

With 20 in staff and experience spanning more than a decade, we back grownup brands and startups alike in creating standards-compliant websites and business applications.

Management - Inbox is a private company owned by Sinisa Rogic, managing partner and Investment house Senzal Capital. It has been profitable since inception.

Specifically, we provide:

JAVA driven e-commerce web sites and large *News&Media* portals

Internet strategy planning user experience

Web design, support & maintenance

- **languages** JAVA, JavaScript, CSS, XHTML, XML
- **technologies** Ajax, JSP/JSF
- **databases** Oracle, MySQL, PostgreSQL
- **frameworks** NetBeans, SVN

Industries – Ecommerce, Media and communications, Leisure and entertainment, Government and NGO

Inbox Software for the Internet

Inbox **WORK**

- Information architecture
- Evaluation and concept testing (Usability study)
- Internet Consulting
- Web Graphic Design
- JAVA Content Management Systems Programming
- Support - application and system
(Linux, Apache, TomCat)

WHY Inbox?

- **Specialized in Internet Business Application Development and Content Management System**
- **12 years of experience**
- **International Clients list**
- **In house development**
- **More than 200 projects**
- **20 employees**
- **Partner relationship with clients**
- **Stabile technology**

Inbox SOFTWARE

is a modern *content management system* designed by INBOX to provide you with easy content administration. The system supports high scalability requirements and can handle huge amounts of traffic on web portals which daily receive over 400,000 unique visitors. Entirely developed in-house, is recognized as the most reliable CMS tool in Serbia. It's the only CMS with technical support available around the clock.

Time Tracker is at the core of all project management activities at INBOX. This time tracking application offers a full insight into overall project status from every aspect of your project - by time, task, client, project, etc. It gives the client a heads-up on the status of the project at hand and how much time you've spent on a task.

AdBOX is the most up-to-date banner management software running on Serbia's most-visited Web portals (B92.net, RTS.rs, Pressonline.rs, Novosti.rs, YC.rs, etc.) AdBOX provides real-time statistics for each advertising campaign and banner display, easy and efficient administration and set-up of ad campaigns, banner optimization, geo-targeting by city in Serbia, etc. AdBOX interacts with the world's most popular banner management solutions - DoubleClick and OpenAds.

The Inbox WAY

RTS.rs

Project

RTS approached Inbox for a brand new Web portal. **The objective was to position the portal among the three most-visited in the country.** Inbox was tasked to create RTS online presence and implement the entire project from the ground-up – from concept planning to support and maintenance. **RTS.rs is currently the third most-visited in Serbia.**

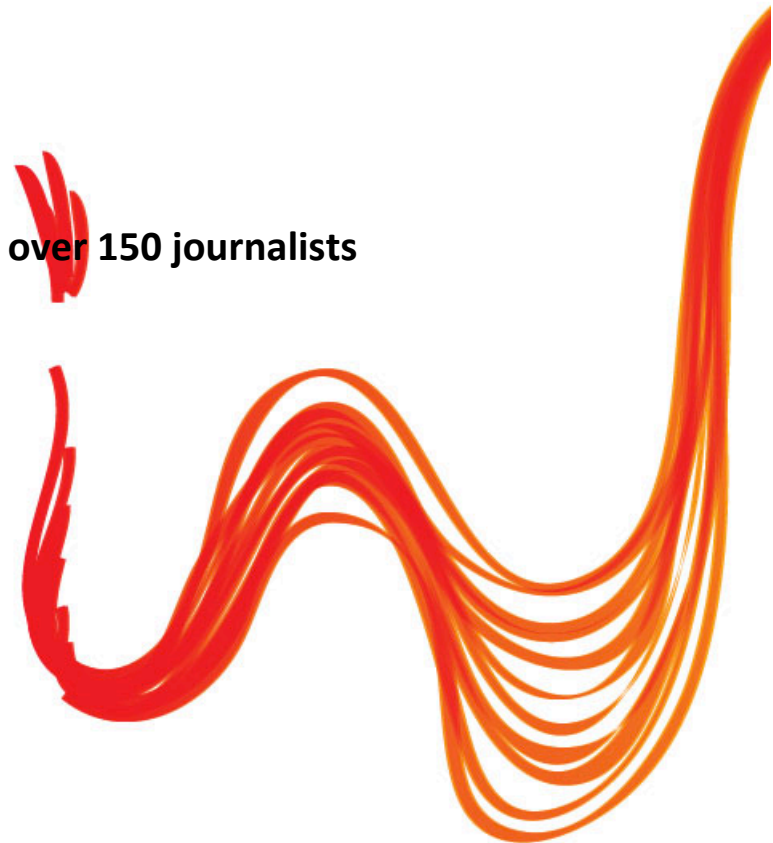

Inbox deliverables - *full service* :

- Research into Internet trends in the world and Serbia
- Competitive market analysis
- Information architecture: defining: content, structure and layout, navigation and functionality
- Evaluation of architecture and testing concepts defined (Usability)
- Editorial consultancy: number of Web developers, editors-in-chief, journalists...
- Graphic design of portal elements
- Custom NoraCMS
- Support and maintenance
- Server administration

RTS.rs Inbox RESULTS

- In 2 years, the 4th most-visited Web portal, **with more than 300,000 unique visits a day**
- **Voted Serbia's BEST portal in the news category by PC Press in 2009, 2010, 2012**
- **FASTEST** home page load time = 1 sec **IN THE REGION**
- **A complex and stable system** simultaneously used by **over 150 journalists and content editors**

Pressonline.rs

Project

Press online is a Web portal of Press daily. The project started before 2005. The objective was to make it one of the three most-visited Web portals in Serbia. Inbox developed a strategy, designed the portal, did evaluations every six months to meet the growing needs of the portal.

The goal was reached in 2009, a year a head of deadline.

Inbox deliverables - *full service*:

- Research into Internet trends in Serbia and worldwide
- Competitive market analysis
- Information architecture
- Evaluation and testing of concepts defined
- Editorial consultancy
- Graphic design of all portal elements
- Custom NoraCMS
- Support and maintenance
- Server administration

Yellowcab.rs

Project

The objective was to create a Web portal with information on every event taking place in Belgrade, accessible in maximum 2 clicks.

Inbox developed an efficient Web portal / online guide with special data structures and custom CMS tailored to the needs of Yellow Cab. What differentiates this guide from others is the option to connect different types of content and aggregate them on dynamically created pages. Yellow Cab is currently the most-visited online guide in Belgrade, with over 5000 unique visitors on a daily basis.

Inbox deliverables - *full service*:

- Research and consulting
- Information architecture
- Evaluation and testing of concepts defined
- Editorial consultancy
- Graphic design of all portal elements

Inbox SOFTWARE

NoraCMS is a modern *content management system* designed by INBOX to provide you with easy content administration. The system supports high scalability requirements and can handle huge amounts of traffic on web portals which daily receive over 400,000 unique visitors. Entirely developed in-house, NoraCMS is recognized as the most reliable CMS tool in Serbia. It's the only CMS with technical support available around the clock.

Time Tracker is at the core of all project management activities at INBOX. This time tracking application offers a full insight into overall project status from every aspect of your project - by time, task, client, project, etc. It gives the client a heads-up on the status of the project at hand and how much time you've spent on a task.

AdBOX is the most up-to-date banner management software running on Serbia's most-visited Web portals (B92.net, RTS.rs, Pressonline.rs, Novosti.rs, YC.rs, etc.) AdBOX provides real-time statistics for each advertising campaign and banner display, easy and efficient administration and set-up of ad campaigns, banner optimization, geo-targeting by city in Serbia, etc. AdBOX interacts with the world's most popular banner management solutions - DoubleClick and OpenAds.
